EasyAsk is Breaking New Ground in Business Intelligence

In an ideal world, all businesses would make proactive business decisions based on accurate, up-to-date information. Until recently, this was merely an idealistic theory, but EasyAsk is breaking new ground in business intelligence. [Read more...](#)

EasyAsk the next step in business intelligence software

Business intelligence (BI) software ranked eighth in the Gartner list of top ten strategic business technologies for 2009. [Read more...](#)

QBCon Invited to ITWeb BI Conference 2009

ITWeb invited QBCon to present a case study demonstrating the use and application of business intelligence at the ITWeb Business Intelligence 2009 Conference. Sales and Marketing Director Gustav Piater will discuss how a BI tool such as EasyAsk can improve business despite the challenges of more data and increasing user demands.

The conference will take place from 25 – 26 February 2009. Visit the ITWeb website <http://www.itweb.co.za/events/bi2009/> for more details.

Progress Apama Teams up With Blt Systems to Offer New Hosted Trading Solutions

Access to CEP capabilities including low latency algorithmic and smart order routing with connectivity to Italian and International markets made available

Progress Software Corporation and Blt Systems, part of the London Stock Exchange Group, today announced that they will join forces to offer customers a range of hosted complex event processing (CEP) capabilities, such as algorithmic trading and smart order routing, provided by the Progress(R) Apama(R) CEP platform. [Read more...](#)
