### **QBCon Ads Web Front-end to SAP Business One®**

QBCon has designed a web interface for SAP Business One® that will allow users to remotely access the small business Enterprise Resource Planning (ERP) system. The development is part of a SAP Business One® implementation by SMB Solutions. The QBCon interface makes it possible for management to track project status and staff activity in real time, for projects that take place off-site. [Read more...](#)

### **Success Story**

QBCon lubricates the wheels at Brent Oil

If billing and costing is at the heart of any operation's profit then the oil and fuel reseller, Brent Oil, has made the perfect choice. QBCon, a business solution provider, is one of the few companies able to design the custom billing and costing ERP that can accommodate Brent Oil's unique trading environment. [Read more...](#)

### **About QBCon Enterprise**

Apart from the functions normally associated with ERP systems, such as accounting, resource management, stock management, point of sale systems and maintenance scheduling, the QBCon system also offers EasyAsk, a business intelligence tool that allows user-specified reports accessed with standard English language requests.
