LIMS: Saving You Time

A successful manager knows how to apply the skills of his employees to the benefit of a business.

Many laboratories still rely on dated methods to keep track of test results and samples. These methods mainly involve skilled laboratory staff wasting hours documenting and filing their findings. For as long as it takes to fill out forms, laboratory employees are getting paid skilled labour wages to do a clerk's job. [Read more...](#)

LIMS Blog

Laboratory Information Management Systems (LIMS) are still underrated by many laboratories. QBCon created a LIMS blog to bring across how pivotal a good LIMS system is to the successful running of a laboratory. We will also aim to answer all your queries relating to laboratory management software. To view the LIMS Blog [click here](#).

Did You Know?

Customisation is an important part of QBCon's software development. We realise that no one knows your laboratory better than you. Therefore, we spend a lot of time at your laboratory, talking to everyone from the clerk at reception to the most qualified laboratory staff members. Based on your laboratory's unique needs, QBCon can combine features and functions or create new features and functions to benefit your laboratory.

Archives - Real Cost Versus the Ticket Price

Off-the-shelf, open source and rent to own are all variations on the same theme. The idea is to get the client interested at a low price and to make money off them in some other way. This is similar to buying an inkjet printer for R500 and then having to pay R600 every time you change the ink. When you run a professional lab your LIMS is the heart of your business. It is the key to your efficiency and regulatory accreditation. [Read more...](#)
