### **Real Cost Versus the Ticket Price**

Off-the-shelf, open source and rent to own are all variations on the same theme. The idea is to get the client interested at a low price and to make money off them in some other way. This is similar to buying an inkjet printer for R500 and then having to pay R600 every time you change the ink. When you run a professional lab your LIMS is the heart of your business. It is the key to your efficiency and regulatory accreditation. **Read more...**

### **'Virtual water' a winner**

Stockholm - A scientist who developed a way to calculate how much water is used in the production of anything from a cup of coffee to a hamburger was awarded the 2008 Stockholm Water Prize on Wednesday.

Professor John Anthony Allan of the University of London in Britain won the award for introducing the concept of "virtual water", a calculation method that has changed the nature of trade policy and research. **Read more...**

### **Did you know...?**

Multiple Language Interface feature can be added to Lab-i. This allows you to invoice and generate reports in the client's preferred language. This added feature increases service delivery to the client, ultimately increasing customer satisfaction and retention.
