Dries Louw says LIMS is critical for Labs

Dries Louw, Executive Manager of Laboratory Services for ERWAT, has sung the praises of LIMS in laboratories at a QBCon industry breakfast session held at Emperors' Palace on 17 October.

Louw's knowledge of water and waste water management made it clear that the right skills and highly developed technologies, such as an effective laboratory information management system (LIMS), will aid in ERWAT's success in improving quality services in the industry and environment. Louw said that "Effective equipment can be used to obtain results and better analysis." [Read more...](#)

Efficient lab water treatment system for Tshwane Water Works

The City of Tshwane Waste Water Treatment Works recently installed two new Elga water systems, the Centra and Option Q at their Daspoort laboratory in Pretoria. The new units have transformed the control and supply of reverse osmosis and pure water to the laboratories and provide better water management with a series of monitors, alarms and system operations. [Read more...](#)

Did you know...?

Did you know that the QBCon Lab-i system has a competitive advantage over other vendors, because it can be configured and customised to your company's specific environmental needs?
