Ampaglas Reduce Production Loss with New CMMS

Ampaglas has been an industry leader in technological advancements in the plastic sheeting industry since 1973. They were the first company in South Africa to manufacture flat and profile polycarbonate and twin wall polypropylene sheets and will continue to be a market leader with a new plant maintenance system from QBCon. Genrec Passes ISO Standards with the Help of Q-CMMS

South African Steel Fabricator and heavy machining company, Genrec, passed the International Organisation for Standardisation (ISO) standards covering Operations, Safety, Health and Environment. The company's ISO9001 accreditation follows the installation of QBCon computerised maintenance management system- Q-CMMS. [Read more...](#)

25 Questions Before Investing In a CMMS

Before investing in a computerised maintenance management system (CMMS), it is important to ask yourself questions to help avoid consequences for implementing the computerised maintenance system.

Please sign in or register to answer the questions for our [25 Questions Before Investing in A CMMS](#) survey.

Running any plant without a Computerised Maintenance Management Systems (CMMS) is throwing money into the water. QBCon's Q-CMMS is a plant and facilities management system that helps you manage your plant. Q-CMMS makes provision for preventative maintenance and asset management so that you lose as little production time as possible during the maintenance period. Q-CMMS also saves time by issuing job cards and doing inventory.
