West Rand Engineering Changes Its Manufacturing Environment With New CMMS

A Computerised Maintenance Management System (CMMS) is a tool no modern manufacturing plant should be without. West Rand Engineering (WRE) enhanced its plant maintenance and safety-related activities by replacing their existing, outdated CMMS. Having a reliable CMMS is imperative to the effective management of any manufacturing plant. A functioning CMMS ensures that maintenance and engineering managers can examine repair history, identify trends and improve the reliability of equipment. [Read more...](#)

Announcement

QBCon would like to congratulate Progress Software on their recent success in the ESB category in the Forrester Research awards.

Progress topped the log in the *The Forrester Wave: Enterprise Service Buses, Q1 2009* report with their Sonic ESB product. The report evaluated the strengths and weaknesses of 10 top commercial and open source ESB vendors. Progress achieved success based on the following criteria: [Read more...](#)

QBCon will showcase its unique and fully customisable laboratory information management system Lab-i at this year's Lab Africa exhibition.

QBCon will demonstrate how Lab-i can simplify your laboratory systems, increase productivity and save you money.

Join us at Lab Africa from 2 - 4 June 2009 at the Dome in Randburg.

25 Questions Before Investing In a CMMS

Before investing in a computerised maintenance management system (CMMS), it is important to familiarise yourself with every aspect of CMMS by asking these 25 questions.

Please sign in or register to answer the questions for our **25 Questions Before Investing In A CMMS** survey.

LIMS Survey

The QBCon LIMS Survey provides laboratories with a clear view on nearly every aspect of LIMS. After the completion of this survey laboratories will realise the importance of how a laboratory need to perform.

Please sign in or register to answer the questions of our **Questions to Ask Yourself before Investing in LIMS** survey.

QBCon Blogs

QBCon wish to invite you to visit our blog page on the QBCon website. We have created the following blogs, **Computerised Maintenance Management Systems (CMMS)**, **Business Intelligence (BI) tool EasyAsk**, **Laboratory Information Management System (LIMS)** and **Enterprise Resource Planning (ERP)**. We feel that by creating these blog, we provide the perfect resource to provoke the necessary discussions that will help you make business decisions.
